Warning: Carefully read the following instructions before using your new helmet. This helmet is for pedal cyclists, skateboarders or rollerskaters. No helmet can protect the wearer against all possible impacts. The helmet is designed to be retained by a strap under the lower jaw. To be effective, a helmet must fit and be worn correctly. To check for correct fit, place helmet on head and make any adjustments indicated. Securely fasten retention system. Grasp the helmet and try to rotate it to the front and rear. A correctly fitted helmet should be comfortable and should not move forward to obscure vision or backward to expose the forehead. Do not alter or remove any component of the helmet.

No attachments should be made to the helmet except those recommended by the helmet manufacturer. Use genuine (original) spare parts only. The helmet is designed to absorb shock by partial destruction of the shell and liner. This damage may not be visible. Therefore, if subjected to a severe blow, the helmet should be destroyed and replaced even if it appears undamaged. Do not apply decals to your helmet. The helmet may be damaged and rendered ineffective by petroleum and petroleum products, cleaning agents, paints, adhesives and the like, without the damage being visible to the user. A helmet has a limited lifespan in use and should be replaced when it shows obvious signs of wear. It is recommended to replace the helmet after 3 years from the date of purchase. This helmet should not be used by children while climbing or doing other activities where there is a risk of hanging or strangulation if the child gets trapped whilst wearing the helmet.

Size adjustment: If the helmet is available in different sizes select the one which suits you the best.

If the helmet is provided with the Safe-T Twist 2, Safe-T E-Twist, Safe-T E-mid, Safe-T Duo, Safe-T Smart, Safe-T Advanced (Fig. B1-B2), turn the wheel clockwise until you reach the right fit, while the helmet is on your head.

Strap adjustment: Adjustment of straps (Fig C1). Adjust the position of the side loops (1) allowing the straps to run through so they position themselves underneath the earlobes (Fig A). Adjust under the throat (2). Allow the strap to run through the loop of the buckle (3, Fig. C2). This final jaw adjustment must not be positioned on side of the jaw.

To obtain the correct position it is possible to run the strap through the back anchorage (4) When the size adjustment and straps are fitted correctly the helmets should not move too far forward or backward on the head. Ensure that the helmet does not sit on the forehead or too far back (Fig A).

Caution: Helmets will be damaged if exposed to temperatures exceeding 50° C (120° F). Inside cars temperatures can exceed 80° C (180° F) on hot summer days.

Cleaning: Use only mild soap and water to clean your helmet.

Original spare parts: Peak and pad sets are available through our retailers network worldwide. In case you are having difficulties in finding MET spare parts dealer near you, it is also possible to purchase these items on line at: www.met-helmets.com

Warranty: MET warrants its helmets for a period of 2 years from the original date of purchase to be free from defects in material or workmanship for the original owner. To apply for the warranty request, the helmet should be returned to the shop from where the helmet was purchased for inspection, or send it to MET at your own cost. Helmets must be returned in proper individual protective packaging with a detailed description of the claim, along with an original proof of receipt. If the helmet is found to be defective in materials or workmanship it will either be repaired or replaced with the nearest helmet model in price, size and colour available. Helmets that are not warrantable will be at the consumer's disposal.

MET shall not be held liable for any indirect, special or consequential damages. The warranty does not apply to helmets that have not been used properly according to the met helmet owner's instruction manual. The warranty does not cover normal wear.

The warranty does not cover damages caused by accidents, abuse, negligence, incorrect adjustment, or for use other than that intended by the manufacturer. Any modification made by the user will render the warranty null and void. The warranty does not cover damages due to heat.

Crash replacement program*: If your MET helmet is damaged in a bicycle accident within 2 years from the original date of purchase, MET proposes to replace it at a reduced cost. To receive advice of the exact cost of a new replacement helmet and information how to proceed, contact the MET distributor** of the country where you bought the helmet. The damaged helmet will be replaced with the nearest model in price, size and color available in the current product line. The crash replacement program is only valid once per purchased helmet.

*This service is not available in all countries.
**if you do not know the MET distributor please contact: crp@met-helmets.com
